# PERFORM BETTER RECOVER FASTER

The Sports Med accessories collection helps reduce pain associated with injury and stabilizes the muscles and tendons during physical activity. Keeps muscles aligned and firmly supported. Wicks moisture. More comfortable than traditional neoprene accessories.

## COMPRESSION ELBOW SUPPORT

3D970

Compresses and supports the muscles and tendons surrounding the elbow. Decreases elbow pain and is perfect for stabilizing muscles during impact. Ideal for racket sports, ball sports, and weight lifting.

## COMPRESSION KNEE SLEEVE

3D941

Our knee sleeve has varying compression zones to provide stabilizing support to the patella with a reduced compression zone directly on the patella for comfort. Greater flexibility of movement. Made with the same material as our compression garments, the EC3D knee sleeve retains less moisture than traditional neoprene knee sleeves.

## COMPRESSIVE EPICONDYLITIS BRACE 3D971

The Epicondylar bracelet relieves elbow tenderness pain such as "Tennis Elbow" (lateral epicondylitis), muscle pain in the elbow or inflammation / irritation in the same area. Two integrated pads to give the extra custom support to tendons and aching muscles. The Velcro® band is used to regulate compression as required. Relieves the pain of the muscle insertion point, stimulates healing and reduces pain in the forearm. Effective on the right and on the left.

Content	Size	S - L
70% Polyester 30% Élasthanne	Couleurs	Black magic with White Logo (MBK)

## 3D PRO COMPRESSION KNEE SLEEVE

3D940

Our 3DPro Compression Knee Sleeve is designed with a higher compression zone around the patella to help stabilize, and control your knee without compromising movement. The removable and adjustable Velcro® band can be positioned from the inside or outside of the knee to guide the patella into perfect alignment. Obtain greater flexibility, and less moisture retention than with the traditional Neoprene knee sleeve.

- > Supports and reduces tension to muscles and ligaments
- > Strategically placed zones to stabilize and align the patella
- > Provides relief of minor knee injuries
- > Comfortable & lightweight - Easy to slip on

Content	Size	1 - 5
70% Polyester 30% Elastane	Color	Charcoal (CH)
